The Honorable Tom Cole
Ranking Member, Subcommittee on Labor, Health
and Human Services, Education and Related Agencies
U.S. House of Representatives
Washington, DC 20515

Dear Chair DeLauro, Ranking Member Granger, and Ranking Member Cole:

On behalf of organizations dedicated to improving the health and well-being of children and adolescents, we write to thank you for the \$25 million in funding provided to the Pediatric Subspecialty Loan Repayment Program (PSLRP) in the House Fiscal Year (FY) 2022 Labor, Health and Human Services (HHS), Education and Related Agencies appropriations bill. This historic investment in the pediatric subspecialty workforce will help ensure children have access to the specialized care they need in their communities.

Our organizations have long advocated to increase access to pediatric medical subspecialty, pediatric surgical specialty, and child and adolescent mental health care for young people, including those with chronic conditions and serious acute illnesses who require specialized care. Congress made major progress toward this goal when it reauthorized PSLRP in the Coronavirus Aid, Relief, and Economic Security (CARES) Act last year. Your inclusion of initial funding for the program is another important step forward. Once enacted, this funding will allow the Health Resources and Services Administration (HRSA) to begin the work of implementing this program and providing much-needed loan repayment to pediatric subspecialists. This targeted financial support will help address high medical school or other graduate school debt that serves as a barrier to training in pediatric subspecialties and help address underlying economic factors that are driving subspecialty shortages.

We appreciate your commitment to investing in the pediatric subspecialty workforce and urge you to ensure this funding is included in a final FY 2022 omnibus spending package. Thank you for all you do for children.

Sincerely,

Dear Representatives Schrier and Joyce:

On behalf of organizations dedicated to improving the health and well-being of children and adolescents, we write to thank you for your leadership to secure \$25 million in funding for the Pediatric Subspecialty Loan Repayment Program (PSLRP) in the House Fiscal Year (FY) 2022 Labor, Health and Human Services (HHS), Education and Related Agencies appropriations bill. This historic investment in the pediatric subspecialty workforce will help ensure children have access to the specialized care they need in their communities.

Our organizations have long advocated to increase access to pediatric medical subspecialty, pediatric surgical specialty, and child and adolescent mental health care for young people, including those with chronic conditions and serious acute illnesses who require specialized care. Congress made major progress toward this goal when it reauthorized PSLRP in the Coronavirus Aid, Relief, and Economic Security (CARES) Act last year. Your efforts to champion funding for the program were critical to taking this major step forward. Once enacted, this funding will allow the Health Resources and Services Administration (HRSA) to begin the work of implementing this program and providing much-needed loan repayment to pediatric subspecialists. This targeted financial support will help address high medical school or other graduate school debt that serves as a barrier to training in pediatric subspecialties and help address underlying economic factors that are driving subspecialty shortages.

We appreciate your leadership to bolster the pediatric subspecialty workforce. Thank you for all you do for children.

Sincerely,
